

Integrative Neuroscience Research Center Seminar Schedule

Tuesday, September 29
"Modeling and Optoelectronic
Realization of an Artificial
Cortex"
Ramin Pashaie, Ph.D.
University of Wisconsin -
Milwaukee

Tuesday, October 13
"Modulation of Glycine-
activated Ion Channel Function
and Pharmacology by
Intracellular G β y Signaling"
Luis G. Aguayo, Ph.D.
University of Concepcion, Chile

Thursday, October 15
"Aging, Training, and Control of
Muscle Force"
Brian Tracy, Ph.D.
Colorado State University
Location TBA

Tuesday, November 3
"Stress, Drugs, and Dopamine:
Interactions that Increase
Addiction Susceptibility"
Michaela Marinelli
Chicago Medical School

Tuesday, November 17th
"Neural Systems Regulating
Anxiety States: Focus on
Serotonergic Systems"
Chris Lowry, Ph.D.
University of Colorado

Tuesday, December 1st
TBA
Janet Neiswander, Ph.D.
Arizona State University

Tuesday, December 8th
"Dietary Amino Acids and
Proteins Influence Serotonin
Synthesis in Brain: Functional
Implications"
John Fernstrom
University of Pittsburgh

**Seminars will be held in Schroeder Complex 256 at 3:30 unless
otherwise specified.**
